Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 7 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's admission of the prior art shown in fig. 5.

These claims stand rejected as discussed in the previous office action. Note that the lenses(510,520) are shown to cover or extend over the optical field of at least one of the plurality of mirrors. Further regarding claim 7, note that the term "integral" has been held to be sufficiently broad as to encompass structures joined together. Thus, the covering lenses are integral with the rest of the apparatus.

3. Claims 1-3,7-9 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Neilson 2003/0002783.

These claims stand rejected as discussed in the previous office action. Note that the lenses(107,117) are shown to cover or extend over the optical field of at least one of the plurality of mirrors. Further regarding claims 7-9, note that the term "integral" has been held to be sufficiently broad as to encompass structures joined together. Thus, the covering lenses are integral with the rest of the apparatus.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 2,3,8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admission of the prior art shown in fig. 9 in view of Neilson.

Art Unit: 2872

These claims stand rejected as discussed in the previous office action. Note that the lenses are "integral" as discussed above.

Response to Arguments

6. Applicant's arguments have been fully considered but they are not persuasive.

Applicant has argued that the prior art does not show "covering lenses." However, the lenses shown in both applicant's fig. 5 and the Neilson reference may clearly be considered "covering lenses" since these lenses cover or extend over the optical field of the mirror(s) as discussed above. Accordingly, the claims do not patentably distinguish the present invention over the prior art.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened

Art Unit: 2872

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
